

# POOL

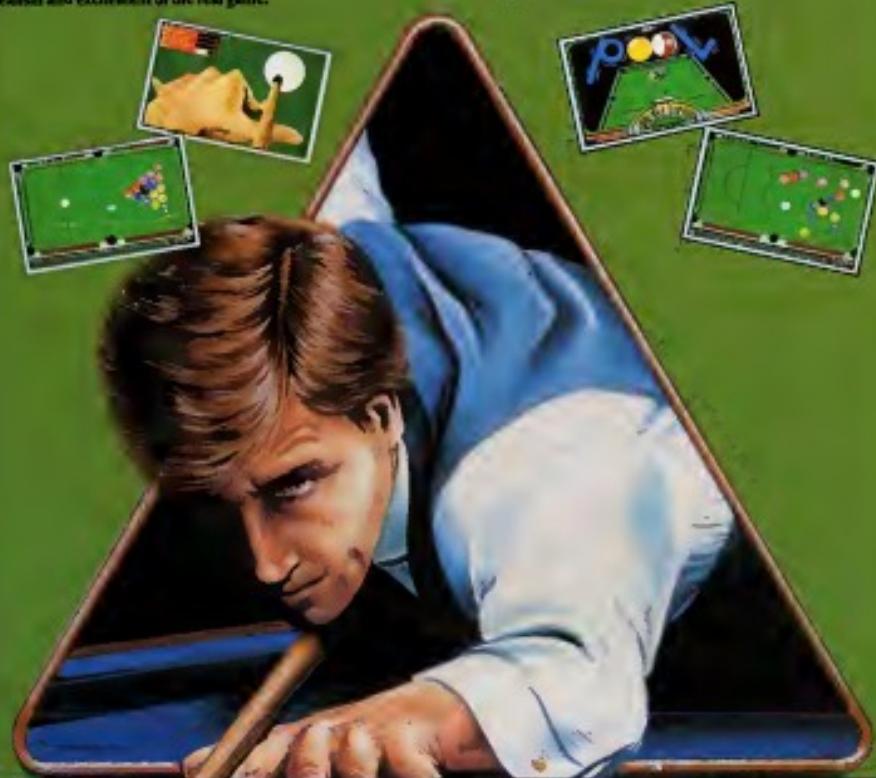

So you think you are the demon of the Pool Halls, the master of the eight ball, you can make the perfect clearance, well here is the game for you. Chalk up against the best in this complete simulation of the challenging game of Pool.

This simulation gives you complete control of your shots. Position the cursor to aim your shot, then use the joystick to aim the cue to select the strength and spin, thus allowing you to use all the skills that you have gathered in your misspent youth to full effect.

It all adds up to create a simulation that really brings you all the realism and excitement of the real game.

## Features:

- Realistic animation, both of the table and of your cue to take shots.
- The movement of the balls is exactly as you would see it on a real table.
- Digitized effects and announcements.
- Using all the extra computational power from the Amiga hardware.
